

Tropical Agriculture and Development

Vol. 64, No. 2

June 2020

CONTENTS

Original Article

- Relationship between Temperature and Fruit Quality during Ripening Period in Passion Fruit
.....A. Shimada, K. Kuramoto, B.-J. Park, F. Hashimoto, and M. Yamamoto.....47
- Effect of Temperatures on Passion Fruit Flowering:
A Simulation Model to Estimate Number of Flowers
..... H. Matsuda and H. Higuchi.....54
- Changes in Leaf and Trunk Characteristics Related to Starch Yield with Age in Two Sago Palm
Folk Varieties Grown near Jayapura, Papua, Indonesia
.....Y. Yamamoto, K. Katayama, T. Yoshida, A. Miyazaki, F. S. Jong, Y. B. Pasolon,
H. Matanubun, F. S. Rembon, Nicholas, and J. Limbongan.....61
- Photosynthetic Responses to the Environmental Factors and Leaf Nitrogen Contents in
the Mexican Sunflower (*Tithonia diversifolia*)
..... H. Takaragawa, H. T. Dinh, M. Horie, M. Ueno, and Y. Kawamitsu.....72
- Changing Practices from Swidden to Permanent Agriculture in Traditional Swidden Cultivation Areas
-Case Studies in Three Karen Villages of the Bago Mountains, Myanmar
..... K. N. Swe and E. Nawata.....80
- Varietal Differences in Thermal Response of Passion Fruit Pollen Germination
..... H. Matsuda and T. Ogata.....90
- Kodjari Phosphate Rock for Rain-fed Lowland Rice Production in the Sudan Savanna, Burkina Faso
..... S. Nakamura, S. Saidou, A. Barro, D. Jonas, M. Fukuda, T. Kanda, and F. Nagumo.....97
