

Organic agriculture, environment and food security

CONTENTS

ABSTRACT	iii
CHAPTER 1	
GENERAL CONCEPTS AND ISSUES IN ORGANIC AGRICULTURE	1
Definitions and concepts	3
Development of organic agriculture	5
Resource use efficiency in organic agriculture	8
CHAPTER 2	
ORGANIC AGRICULTURE AND THE ENVIRONMENT	21
The ecosystem approach in organic agriculture	23
Organic agriculture and abiotic resources	25
Organic agriculture and biodiversity	34
Organic agriculture and climate change	53
Organic agriculture and desertification	57
Organic agriculture and comprehensive evaluations	61
Conclusions	61
CHAPTER 3	
CERTIFIED ORGANIC AGRICULTURE – SITUATION AND OUTLOOK	63
Introduction	65
The organic industry at the turn of the century	65
Factors driving organic agriculture growth	82
Prospects for organic agriculture	96
Conclusions	105
CHAPTER 4	
NON-CERTIFIED ORGANIC AGRICULTURE IN DEVELOPING COUNTRIES	107
Introduction	109
Development scenario of non-certified organic agriculture	109
The agro-ecological features of indigenous agricultural strategies	118
The potential of non-certified organic agriculture	125
Factors affecting the viability of small farmers	131
Scaling up non-certified organic agriculture	133
Conclusions	137

CHAPTER 5**LESSONS FROM CERTIFIED AND NON-CERTIFIED ORGANIC PROJECTS IN DEVELOPING COUNTRIES**

Why organic agriculture for food security?	139
Recent evidence from certified and non-certified organic systems in developing countries	141
Twenty-nine case study narratives	141
Key lessons learnt on processes for improvement	144
Conclusions on scaling-up experiences in organic agriculture	158
	160

CHAPTER 6**ORGANIC AQUACULTURE – CURRENT STATUS AND FUTURE PROSPECTS**

State of development of organic aquaculture	163
Organic aquaculture and the environment	165
Long-term prospects for certified organic aquaculture products	170
Potential development in developing countries and likely impact on food security	173
	175

CHAPTER 7**FARMERS INNOVATIONS, COMMUNITY DEVELOPMENT AND THE ECOLOGICAL MANAGEMENT IN ORGANIC AGRICULTURE – CASE STUDIES**

<i>Case study 1:</i>	No-till sugar cane cultivation with alternate row irrigation, Belgaum, Karnataka, India	177
<i>Case study 2:</i>	Farming with weeds, Mohanpur, Uttar Pradesh, India	179
<i>Case study 3:</i>	Land development and revival of traditional agriculture with tribal communities in the Nilgiris, Tamil Nadu, India	186
<i>Case study 4:</i>	Protecting fragile resources through traditional management in Naw, Islamic Republic of Iran	190
<i>Case study 5:</i>	Organic and fair trade rice - back to school in the farmers' fields, Surin and Yasothorn Provinces, Thailand	200
<i>Case study 6:</i>	Organic agriculture and rural livelihoods in Iganga District, Uganda	206
<i>Case study 7:</i>	Sustainable rural life and agro-ecology, Santa Catarina State, Brazil	216
