

# Human energy requirements

Report of a Joint FAO/WHO/UNU Expert Consultation  
Rome, 17–24 October 2001

# CONTENTS

FOREWORD	iii
PREFACE	vii
1. INTRODUCTION	1
1.1 What is new in this report?	1
1.2 Intended use of this report	2
1.3 Policy implications	2
References	3
2. PRINCIPLES AND DEFINITIONS	4
2.1 Definitions	4
2.2 Sources of dietary energy	6
2.3 Components of energy requirements	7
2.4 Calculation of energy requirements	7
2.5 Recommendations for physical activity	9
2.6 Glossary and abbreviations	9
References	10
3. ENERGY REQUIREMENTS OF INFANTS FROM BIRTH TO 12 MONTHS	11
3.1 Measurement of total energy expenditure	11
3.2 Equations to predict energy expenditure	11
3.3 Energy needs for growth	13
3.4 Calculation of energy requirements	15
3.5 Catch-up growth	17
References	18
4. ENERGY REQUIREMENTS OF CHILDREN AND ADOLESCENTS	20
4.1 Measurement of total energy expenditure	20
4.2 Equations to predict total energy expenditure	20
4.3 Energy needs for growth	21
4.4 Calculation of energy requirements	21
4.5 Recommendations for regular physical activity	24
4.6 Infections and mild malnutrition	31
References	32
5. ENERGY REQUIREMENTS OF ADULTS	35
5.1 Factorial estimation of total energy expenditure and physical activity level	35
5.2 Estimation of basal metabolic rate	35
5.3 Physical activity level	37
5.4 Energy requirements and dietary energy recommendations	39
5.5 Older adults and the elderly	47
5.6 Recommendations for regular physical activity	49
References	50
6. ENERGY REQUIREMENTS OF PREGNANCY	53
6.1 Gestational weight gain and optimal pregnancy outcome	53
6.2 Determinants of the energy cost of pregnancy	54
6.3 Calculation of energy requirements for pregnancy	56
6.4 Special considerations for malnourished, obese and adolescent pregnant women	60
References	61

<b>7. ENERGY REQUIREMENTS OF LACTATION</b>	<b>63</b>
7.1 Determinants of the energy cost of lactation	63
7.2 Energy requirements for lactation	65
References	66
<b>8. RECOMMENDATIONS FOR FUTURE RESEARCH</b>	<b>67</b>
8.1 Biological questions: conceptual and methodological	67
8.2 Epidemiological and community studies	69
<b>9. CONCLUSIONS</b>	<b>71</b>
References	73
<b>ANNEXES</b>	<b>75</b>
1: Participants – 2001 Joint FAO/WHO/UNU Expert Consultation on Human Energy Requirements	77
2: Authors and reviewers of papers for expert consultation working groups, meetings and follow-up	84
3: Update on predictive equations to estimate basal metabolic rate	87
4: Software application for calculating populations' energy requirements and food needs	89
5: Energy costs of activities	92
