

Volume 22, June 2013

ISSN 0303-2434

International Journal of

APPLIED EARTH OBSERVATION AND GEOINFORMATION

Editor-in-Chief
F. D. van der Meer, The Netherlands

Special Issue:
Spatial Statistics for Mapping the
Environment

Guest Editors:
Gerard Heuvelink, Edzer Pebesma
and Alfred Stein

CONTENTS

Spatial statistics for mapping the environment G.B.M. Heuvelink (Netherlands), E. Pebesma (Germany) and A. Stein (Netherlands).....	1
Bayesian Hierarchical ANOVA of Regional Climate-Change Projections from NARCCAP Phase II E.L. Kang (Cincinnati, OH, USA) and N. Cressie (Columbus, OH, USA).....	3
A Gibbs sampling disaggregation model for orographic precipitation P. Gagnon, A.N. Rousseau, A. Mailhot and D. Caya (Québec, Canada).....	16
Integration of spatial functional interaction in the extrapolation of ocean surface temperature anomalies due to global warming M.D. Ruiz-Medina and R.M. Espejo (Granada, Spain).....	27
Night on Earth: Mapping decadal changes of anthropogenic night light in Asia C. Small (Columbia, New York City, USA) and C.D. Elvidge (Boulder, CO, USA).....	40
Bagging Voronoi classifiers for clustering spatial functional data P. Secchi, S. Vantini and V. Vitelli (Milano, Italy).....	53
Ecological bias in studies of the short-term effects of air pollution on health G. Shaddick (Bath, UK), D. Lee (Glasgow, UK) and J. Wakefield (Washington, USA).....	65
Analysis of geographical disparities in temporal trends of health outcomes using space-time joinpoint regression P. Goovaerts (Ann Arbor, MI, USA).....	75
Bayesian analysis of zero inflated spatiotemporal HIV/TB child mortality data through the INLA and SPDE approaches: Applied to data observed between 1992 and 2010 in rural North East South Africa E. Musenge, T.F. Chirwa (Johannesburg, South Africa), K. Kahn (Johannesburg, South Africa, Umeå, Sweden and Accra, Ghana) and P. Vounatsou (Basel, Switzerland).....	86
On the difficulty to delimit disease risk hot spots M. Charras-Garrido (Saint-Genès-Champanelle, France), L. Azizi (Saint-Genès-Champanelle, France and Saint-Ismier, France), F. Forbes, S. Doyle (Saint-Ismier, France), N. Peyrard (Castanet Tolosan, France) and D. Abrial (Saint-Genès-Champanelle, France).....	99
Downscaling in remote sensing P.M. Atkinson (Southampton, UK).....	106
Sub-pixel land-cover mapping with improved fraction images upon multiple-point simulation Y. Ge (Beijing, China).....	115
Mapping efficiency and information content T. Hengl (The Netherlands), M. Nikolić (Belgrade, Serbia) and R.A. MacMillan (The Netherlands).....	127
Area estimation from a sample of satellite images: The impact of stratification on the clustering efficiency F.J. Gallego and H.J. Stibig (Italy).....	139
Hierarchical Bayesian spatial models for predicting multiple forest variables using waveform LiDAR, hyperspectral imagery, and large inventory datasets A.O. Finley (East Lansing, MI, USA), S. Banerjee (Minneapolis, MN, USA), B.D. Cook (Greenbelt, MD, USA) and J.B. Bradford (Flagstaff, AZ, USA).....	147
