

Houses of Aspirations: for the people, for all of us

When you hear of a "house of aspirations"... do not imagine elite buildings with luxurious interiors and facilities designed by famous architects. "House of Aspiration" is a metaphor used to describe a model of interaction between members of legislative bodies and their constituents.

"Rumah Aspirasi" jangan dibayangkan sebagai bangunan elit dengan interior mewah, fasilitas bagus dan didesain oleh arsitektur kawakan. Rumah Aspirasi disini adalah metafora yang menggambarkan wadah interaksi dan fasilitas yang menghubungkan para anggota lembaga legislatif dengan konstituennya (masyarakat) secara berkelanjutan.

Voice of BMKTI (Eastern Indonesian Youth Front)

It has been long since the demand of equal development for Eastern Indonesia has first been articulated by people from all walks of life in Eastern Indonesia. But, the aspiration has gone with the wind. Up to now, no significant development changes have taken place.

Sudah lama masyarakat kawasan timur berteriak, tua-muda menyuarkan hal yang sama. Mereka minta keadilan pembangunan, namun teriakan itu hanya angin lalu. Buktinya sampai sekarang belum banyak perubahan yang berarti.

Building Health Bases for Isolated Communities: Betani Indonesia Foundation (Yayasan Betani Indonesia) Support for Village Medicine Post

In Papua, isolation can cause death. This is why Betani Indonesia Foundation (YBI) is implementing a program to train staff of Village Medicine Posts to improve access to health services for isolated communities and death number of childbirth deaths and other deaths due to acute diseases, such as malaria and ring worm.

Isolasi bisa menjadi penyebab kematian di Papua, karena itu Yayasan Betani Indonesia (YBI) melaksanakan program kader Pos Obat Desa (POD). Suatu program penyedia kader dan layanan kesehatan bagi komunitas adat terpencil yang hidup di daerah pedalaman guna mengurangi resiko kematian bagi ibu melahirkan, penderita malaria, kaskado dan penyakit akut lainnya.
