

Culture of marine phytoplankton for aquaculture seed production

Milagros R. de la Peña
Annie V. Franco

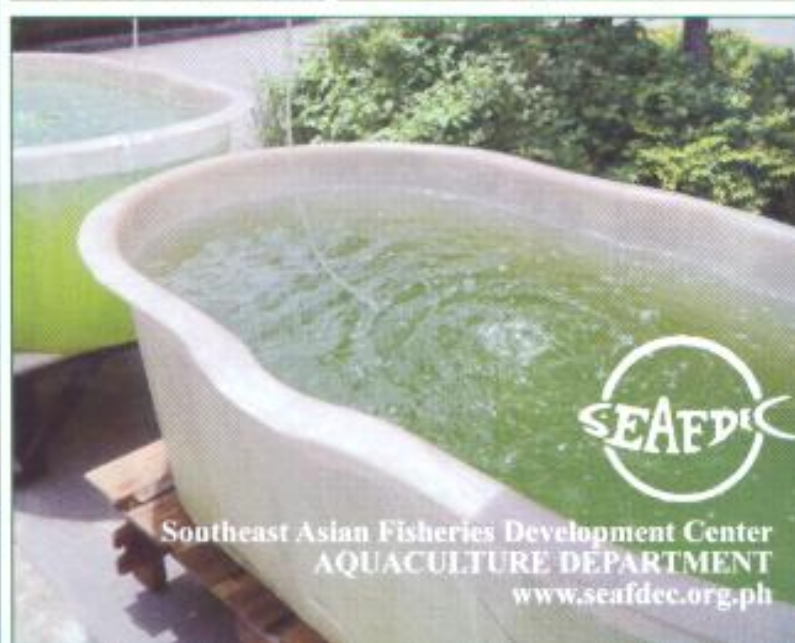

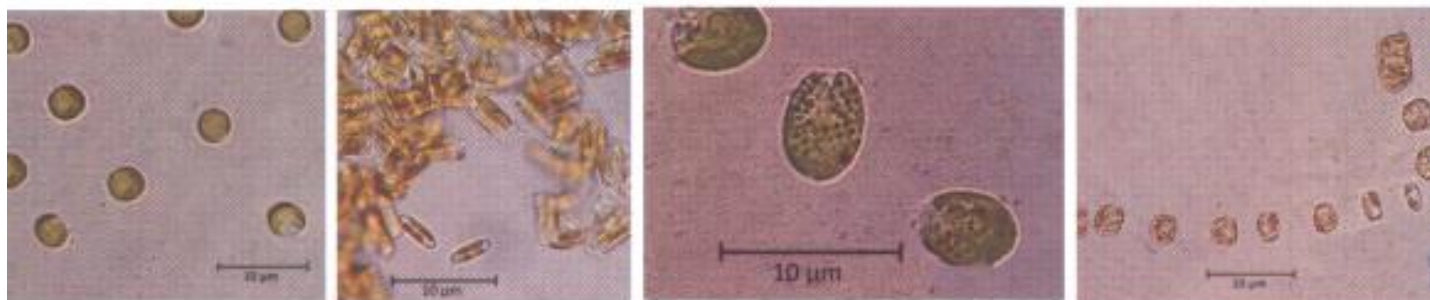

Table of contents

FOREWORD, v

INTRODUCTION, p 1

BIOLOGY OF PHYTOPLANKTON, p 1

Diatoms (Bacillariophyta), p 1

Skeletonema spp., p 1

Chaetoceros spp., p 2

Thalassiosira spp., p 2

Navicula spp., p 3

Amphora spp., p 3

Nitzschia spp., p 3

Green algae (Chlorophyta), p 3

Dunaliella spp., p 3

Chlorella spp., p 3

Nannochlorum spp., p 3

Tetraselmis spp., p 3

Golden brown algae (Prymnesiophyta), p 4

Isochrysis spp., p 4

Yellow-green algae (Eustigmatophyta), p 4

Nannochloropsis spp., p 5

Blue-green algae (Cyanophyta), p 5

Spirulina spp., p 5

NUTRITIONAL VALUE, p 5

Protein, p 8

Lipids, p 8

Carbohydrates, p 9

CULTURE TECHNIQUES, p 10

Design of culture facilities, p 10

Collection of phytoplankton, p 10

Isolation techniques, p 10

Biological isolation, p 10

Serial dilution, p 10

Repeated subcultures, p 12

Capillary pipette method, p 12

Streak plating, p 12

Purification techniques, p 12

Sterilization of culture materials, p 14

Water treatment, p 14

Culture vessels, p 15

Enrichment solution, p 15

GROWTH KINETICS OF PHYTOPLANKTON, p 16

Lag phase, p 16

Exponential or log phase, p 16

Stationary phase, p 16

Death, p 16

REQUIREMENTS OF AN ACTIVELY GROWING CULTURE, p 17

Viable inoculum or starter, p 17

Supply of needed nutrients and microelements, p 17

Suitable physico-chemical conditions, p 17

 Illumination, p 17

 Temperature, p 18

 Aeration, p 18

MAINTENANCE AND MASS PROPAGATION, p 18

Culture vessel and tanks, p 19

Stock cultures, p 19

Volume of inoculum, p 20

Scaling-up of culture, p 20

Programming, p 21

REFERENCES, p 22

APPENDICES, p 25

I. Culture media, p 25

II. Multistep culture of phytoplankton at SEAFDEC/AQD, p 27

III. Counting of phytoplankton, p 28

GLOSSARY, p 31

Acknowledgment, p 32

About the authors, p 33
