

TEA RESEARCH FOUNDATION OF KENYA

Annual Technical Report 2011

Table of Contents

TEA RESEARCH FOUNDATION OF KENYA	vi
VISION	vi
MISSION	vi
MANDATE	vi
TEA RESEARCH FOUNDATION OF KENYA	vii
BOARD OF DIRECTORS	vii
Staff and Finance Committee	vii
Research Advisory Committee	vii
Audit Committee	viii
TEA RESEARCH FOUNDATION OF KENYA SENIOR STAFF	viii
Directorate and Administration:	viii
Department of Botany:	viii
Department of Chemistry:	viii
Department of Plant Protection:	ix
Field Advisory Services and Socio-Economics:	ix
Estate Department:	ix
Medical Unit:	ix
Kangaita Sub-station:	ix
DIRECTOR'S REPORT	x
General	x
Research Highlights	x
Botany investigations	x
Plant physiology and agronomy investigations	xii
Plant Protection Investigations	xii
Tea quality, product diversification and value addition studies	xii
Field Advisory services	xiii
Socio economic studies	xiii
STAFF TRAINING/WORKSHOPS/SEMINARS/SYMPOSIA/FELLOWSHIPS	xiv
PUBLICATIONS BY STAFF	xvi
VISITORS TO TEA RESEARCH FOUNDATION OF KENYA DURING 2011	xviii
BOTANICAL INVESTIGATIONS	1
Plant Improvement	1
Summary	1
Breeding experiments	2
<i>BOT/BREED/1a</i> : Breeding for potential in combined yield and black/green tea quality	2
<i>BOT/BREED/1e</i> : Breeding for green tea varieties	5
<i>BOT/BREED/1f</i> : Breeding for tea varieties with high levels of bioactive molecules	6
Objectives	7
BOT/PT/2004/1	8
BOT/PT/2004/2	8
BOT/PT/2004/3	8
BOT/PT/2005/1	9
BOT/PT/2005/2	9
BOT/PT/2005/3	10
BOT/PT/2005/4	10
Clonal Field Trials	10
BOT/CFT/AHP/2003/1	11
BOT/CFT/RCM/2003/2	11
BOT/CFT/RCM/2004/1	12
Identification of suitable clones for tea seed oil production	33

Clonal adaptability to environments (participatory clonal field trials)	35
Plant Genetics Investigations	38
Genetic Markers	38
<i>BOT/GENET 3b: Detection of genetic diversity in tea using molecular markers.</i>	38
The objectives of the project were:-	39
<i>BOT/GENET 3c: Tea and its related species</i>	40
<i>BOT/GENET 3d(i): Quantitative trait loci mapping in tea.</i>	42
<i>BOT/GENET 3d(ii): Genomic studies in tea</i>	45
<i>BOT/GENET 3e: Germplasm evaluation and characterisation.</i>	47
TRFK/BOT/DUS/2009	50
CHEMISTRY INVESTIGATIONS	52
Soil Fertility, Plant Nutrition and Fertilizer Use Programme/Section	52
Experiments on fertilizer types, rates and application intervals and their effect on tea yields, nutrient uptake and soils properties:	53
<i>CHEM 7F: Long-term response of seedling tea to high rates of NPKS fertilizer, Timbilil Estate, Kericho.</i>	53
Effects of rates of NPK 25:5:5 fertilizer application on the yields	54
<i>CHEM 36F: Effects of long intervals of nitrogen fertilizer application on the yields, nutritional status and quality of seedling and clonal teas at three sites.</i>	55
Effect of rates and intervals of nitrogen fertilizer application on mean yields	55
<i>VICRES/CHEM 48: Evaluation of clone TRFK 6/8 response to N-rates and harvesting intervals in 3 East African countries (Kenya; Tanzania; Rwanda)</i>	56
Effects of N-rates and plucking frequencies on the yields	57
Effects of N-rates and plucking frequencies on mature leaf	58
<i>CHEM 12F: Comparison of response to rates of nitrogen fertilizer by four different clonal teas, Timbilil Estate, Kericho</i>	60
Effects of nitrogen fertilizer rates on the yields of clonal teas	61
<i>CHEM 21F: Effect of plant population and nitrogen fertilizer rates on clone AHP S15/10 tea, Timbilil Estate Kericho.</i>	62
Effects of plant population and nitrogen fertilizer rates on yields	62
Effects of plant population and nitrogen fertilizer rates on leaf nutrients	63
Root studies and nutrient contents of clonal and seedling tea plants	64
<i>CHEM 11F: Root studies and nutrient contents of clonal tea plants at Timbilil Estate</i>	64
Effect on yields and mature leaf nutrients	64
Old tea lands studies	65
Effects of the micronutrients and clones on the yields of tea on replanted on uprooted area	67
Studies of micro-nutrients in clonal tea plants	68
<i>CHEM 37T: Effects of supplementing NPKS 25:5:5:5 with micronutrients on high yielding clone AHP S15/10 tea, Timbilil Estate, Kericho.</i>	68
Effects of supplementing NPKS 25:5:5:5 with micronutrients on the yields of clone AHP S15/10 tea	69
<i>CHEM 43Z: Effects of adding Zintrac to NPK(S) fertilizer on the yields and quality of tea in the Mt. Kenya Region.</i>	69
Effects of rates of NPKS fertilizers in the presence or absence of zinc on the yields of clonal tea	70
Effects of rates of NPKS fertilizers in the presence or absence of zinc on mature leaf nutrients of clonal tea	70
<i>CHEM 46F: Comparison of ARM fertilizer (NPKMgS 22:10:18:12:7 with Zn) with NPK 25:5:5 on sustainable production of tea by smallholder farmers in Kenya.</i>	71
The effects of the fertilizer treatments on the yields and leaf nutrients	71
Fertilizer studies in mechanically harvested high yielding clonal teas	73
<i>CHEM 45F: Effects of soil applied molybdenum on clonal tea yields, Sotik Tea Co. Ltd., Sotik</i>	73
Effects of the fertilizer treatments on tea yields (sorted leaf) and leaf nutrients	73
<i>CHEM 49F: Comparison of foliar applied Lachlan products with NPK(S) fertilizer on the yields and quality of tea.</i>	77
PLANT PHYSIOLOGY AND AGRONOMY INVESTIGATIONS	87

K12/CED 3: Effects of shade trees and nitrogen rates on tea growth and yield, Timbilil, Kericho.	88
CED 17: <i>Effects of shade trees and shelter on tea yields, Sotik Tea Company, Sotik</i>	89
CED14: <i>The Effect of Plant Growth Regulators on yield of tea.</i>	93
Objectives	93
CED14E: <i>The Effect of Green miracle (anti-Transpirant) on yield of tea</i>	94
CED 25: <i>Bringing tea into bearing</i>	96
NUTRITIONAL AND PHYSIOLOGICAL STUDIES	101
AGRO-7F: <i>Effects of sheep manure, enriched or not enriched and NPKS 25:5:5:5 fertilizers on clone TRFK 31/8 tea, Timbilil Estate, Kericho.</i>	101
Objectives:	102
CHEM 43F: <i>Effects of organic and inorganic manures on the yields and quality of tea in the Mt. Kenya Region.</i>	105
VICRES:1 CED CHEM 48: <i>Effect of Geographical Locations on Clone TRFK 6/8 Response to Fertilizer Rates In Kenya</i>	109
VICRES: BOT GENET 4/CED1: <i>Effect of Geographical Locations on Yield and Yield Components of Clonal Tea (Camellia Sinensis (L). O Kuntze) in Kenya</i>	109
CED 43: <i>Survey on sources of energy in the tea growing regions of Kenya</i>	111
ENVIRONMENTAL STUDIES	116
CED 24: <i>Development, implementation and monitoring of the TRFK Environmental policy to ensure conformity to EMCA, 1999</i>	116
Objectives	116
PLANT PROTECTION INVESTIGATIONS.	122
PEST AND DISEASE MANAGEMENT AND ECOLOGY	122
Pest and Disease Reports	122
ENTOMOLOGICAL STUDIES	125
PP.ENT.7: <i>Host-Plant Resistance Studies</i>	125
PP.ENT.7a: (BOT/CAT 2005/1): <i>Field resistance /susceptibility of Kenyan clones to red crevice mites at Kangaita TRFK substation, red spider mites (RSM) at Kipkebe, Sotik and TRFK Timbilil Estate</i>	125
Number of mites	126
GREEN HOUSE BASED STUDIES	130
PP Ent 41/2010: <i>Determination of the preference of Helopeltis Schuotedeni (Mosquito bug) to different clones of Kenyan tea</i>	130
Objectives	130
PP Ent 41/2011: <i>Determination of the preference of weevils (Kangaita and Nyambene) to different clones of Kenyan tea and tree plants</i>	131
Efficacy of TATA UMEME (Lambdacyhalothrin 2.5 % EC) for the control of Helopeltis spp., (Mosquito Bug) (Experiment permit: PCPB/112/Eval/Vol.I/10/15)	132
PATHOLOGICAL STUDIES	134
PP NCST PATH 11 <i>Formulation of Trichoderma harzianum, an antagonist of Armillaria root rot fungus of Camellia sinensis (L) O. Kuntze tea plant) – NCST Funded Project</i>	134
PP NCST PATH 11b. <i>Persistency and effect of Trichoderma spp. on Armillaria Disease (Chebut field experiment)</i>	134
PHOMOPSIS STUDIES	136
WEED MANAGEMENT STUDIES	137
Introduction	137
PP. Weed: 10/03/2010: <i>Efficacy of Dicopur Product Against Broad-Leafed Weeds in TRFK, Timbilil Estate Field 16 (May-August, 2011)</i>	137
Experimental Code-PP. Weed 10/02/2010: <i>Efficacy Trial of Kickout Product in Timbilil Estate Field 16, TRFK as (September- October, 2011 Season)</i>	140
PP. Weed 10/02/2010 <i>The Efficacy Trial of Kick-Out Product in Kangaita May/July, 2011 Season</i>	141
PP. Weed. 10/02/10: <i>Evaluation of Roundup 360 ((Mon 79632) Potassium glyphosate 360g/l) for Efficacy Against Weeds in Tea at Timbilil Field 16 June –Oct 2011 Season</i>	145

PP.Weed. 10/02/10: <i>Evaluation of Roundup 360 ((Mon 79632) Potassium glyphosate 360g/l)) for Efficacy Against Weeds in Tea at Timbilil Field 17 , Aug- Dec 2011Season trial</i>	146
TEA QUALITY, PRODUCT DIVERSIFICATION AND VALUE ADDITION	147
Tea Quality, Manufacture and Product Diversification.. .. .	147
The tea quality section develops analytical methods for tea and also provides support services to the other departments of TRFK on matters of quality of processed tea.	147
CHEM/ANAL/1/Oa: Methods of analysis	147
Theanine ISO Ring Test.	148
CHEM/BIOCHEM/2/1: Clonal selection through quality.	149
CHEM/ANAL/3: Branding of Kenyan teas	149
Data from this project will be presented in future publications.	149
CHEM/ANAL/5: Diversification of Tea products (Organically produced through use of manures and non-use of inorganic fertilizers)	149
<i>BIOCHEM/PD/VA/1: Chemical and Sensory Evaluation of the Quality Parameters of Newly Developed Purple Tea Clones in Kenya</i>	149
BLACK TEA MANUFACTURE AND ANALYSIS.	157
Total soluble solids (TSS)	163
Tasters score on black tea	164
BIOCHEM/PD/VA/2: Amino Acids in Kenyan Teas: Profiling for the Antihypertensive Amino Acid, (Theanine) in processed Kenyan Tea Clones	167
Objectives	169
BIOCHEM/PD/VA/4: Chemical Composition of Tea Seed Oil Cake and Husks	174
Objectives	174
Levels of macro-elements present in the tea seed husks.	175
Levels of macro-elements present in the tea seed oil cake.	177
Levels of microelements present in the tea seed oil cakes	178
Levels of polyphenols and catechins in the tea seed oil cake.	179
BIOCHEM/PD/VA/5: Determination of Levels of Heavy Metals and Fluoride in Green Leaf, Processed Teas and their Infusions in Kenya	183
Copper (Cu).	185
Cadmium (Cd).	186
Market black tea samples	187
Kenyan black tea samples.. . . .	189
Other black tea samples	190
Market black tea samples	194
Kenyan black tea samples.. . . .	207
BIOC/1/2011: <i>Determination of the antioxidant properties of anthocyanins from Kenyan Purple tea in the brain</i>	210
BIOC/2/2011: <i>Determination of the effect of green tea catechins on blood biochemical changes and wound healing in type 2 diabetes</i>	214
BIOC/3/2011: <i>Tea bioactive molecules and their effects on endogenous cellular antioxidant capacity</i>	215
BIOC/4/2011: <i>The effect of tea (Camellia sinensis) on tumor properties and gene expression profiles on scc-12 cancer cell line.</i>	218
Project objectives:	218
Expected outputs:	219
BIOC/5/2011: <i>Antimicrobial properties of tea grown in Kenya</i>	221
Antibacterial and synergistic activities of tea (<i>camellia sinensis</i>) grown in Kenya with antibiotics on selected antibiotic resistant bacteria.	221
Antifungal activity of tea grown in Kenya	229
FIELD ADVISORY AND SOCIO-ECONOMICS	231
FIELD ADVISORY	231
Broad objective	231

FA/1: Visits and visitors	231
Highlights of the visits	233
Achievements/ Challenges	235
FA/3: <i>Training/courses/Symposia/Seminars</i>	237
Objectives	237
FA/4: <i>Demonstrations</i>	239
Objectives	239
FA/5: <i>Publications</i>	239
Institute Seminars and Information Exchange Forums	239
SOCIO-ECONOMICS	240
SO-ECO 1: <i>Tea Consumer Needs Survey</i>	240
Local tea consumption	240
