	The 3rd Africa Rice Congress issued a clarion call to increase investments in Africa's rice sector	

SUSUK VILLALBA/IRRI

About the cover. Rice farmers in Vietnam and elsewhere are being encouraged to not only use less pesticide but also grow flowers and vegetables on the banks of their fields. This creates a healthy ecosystem that is frequented by bees and other beneficial insects. See more on pages 12-13 about how Vietnam has turned back a tsunami of pesticides. (Photo by ©Ho Van Chien)

Rice Today is published by the International Rice Research Institute (IRRI) on behalf of the Global Rice Science Partnership (GRiSP).

IRRI is the world's leading international rice research and training center. Based in the Philippines and with offices located in major rice-growing countries, IRRI is an autonomous, nonprofit institution focused on improving the well-being of present and future generations of rice farmers and consumers, particularly those with low incomes, while preserving natural resources. It is one of the 15 nonprofit international research centers that are members of the CGIAR consortium (www.cgiar.org).

Responsibility for this publication rests with IRRI. Designations used in this publication should not be construed as expressing IRRI policy or opinion on the legal status of any country, territory, city, or area, or its authorities, or the delimitation of its frontiers or boundaries.

Rice Today welcomes comments and suggestions from readers. *Rice Today* assumes no responsibility for loss of or damage to unsolicited submissions, which should be accompanied by sufficient return postage.
