

FAO ANIMAL PRODUCTION AND HEALTH

## IN VIVO CONSERVATION OF ANIMAL GENETIC RESOURCES

COMMISSION ON  
GENETIC RESOURCES  
FOR FOOD AND  
AGRICULTURE

# Contents

Foreword	ix
Acknowledgements	xi
Abbreviations and acronyms	xiii
Glossary of selected terms	xv
User guidance	xxi
<b>SECTION 1</b>	
<b>Reviewing the roles of animal genetic resources and options for their conservation</b>	<b>1</b>
Inventorizing species, breeds and their functions	3
Describing the dynamics of the livestock sector	10
Reviewing the status and trends of animal genetic resources	12
Identifying reasons for the loss of animal genetic diversity	14
Identifying objectives for conservation	17
Reviewing the status of each breed and developing management strategies	20
Comparing conservation strategies	25
References	29
<b>SECTION 2</b>	
<b>Identifying breeds at risk</b>	<b>31</b>
Determining risk status	33
References	56
<b>SECTION 3</b>	
<b>Determining the conservation value of a breed</b>	<b>57</b>
Overview	59
Accounting for factors other than risk status	60
Using information from genetic markers	72
References	84
<b>SECTION 4</b>	
<b>Choosing the appropriate conservation methods</b>	<b>87</b>
Matching breeds and conservation methods	89
Reference	94

---

<b>SECTION 5</b>	
<b>Organizing the institutions for <i>in vivo</i> conservation</b>	<b>95</b>
Overview	97
Involving livestock keepers in community-based conservation	99
Establishing a breeders' association	109
Auditing a breeders' association and its activities	121
Establishing a centralized <i>ex situ</i> conservation programme	125
Establishing a dispersed <i>ex situ</i> conservation programme	129
References	133
<b>SECTION 6</b>	
<b>Designing the conservation programme</b>	<b>135</b>
Maintaining genetic variability within small populations	137
References	155
<b>SECTION 7</b>	
<b>Establishing a breeding programme for conservation and sustainable use</b>	<b>157</b>
Overview	159
Choosing a breeding strategy	161
Optimizing selection response and genetic variability in small populations	169
Cross-breeding for enhanced production	177
References	188
<b>SECTION 8</b>	
<b>Increasing the value and sustainability of conserved breeds</b>	<b>191</b>
Identifying sustainable use options for breeds under conservation	193
Preparing a Biocultural Community Protocol	197
Implementing a "role model breeders" programme	203
Capitalizing on niche market production	207
Enhancing value through ties to geographical origin or cultural significance	214
Capitalizing on the roles of livestock in providing ecosystem services	222
Capitalizing on the societal and cultural functions of livestock	226
References	231
<b>ANNEX</b>	
Overview of sections, tasks and actions	235
