# WATER QUALITY

**Vital nutrient for efficient production**

## CONTENTS ▶▶▶

- 6** Swiss consumer preferences boost domestic production
- 10** The Zegeren farm in Holambra, Brazil, is a third-generation operation
- 20** Dark clouds hang over Ukrainian egg industry
- 24** Finding a vaccine for red mite
- 26** Reducing the risk of salmonella re-contamination in feed
- 32** 20 institutes throughout Europe will be studying laying hen welfare issues

## 16 COVER STORY

Water is often the forgotten nutrient but plays a very important role in unlocking genetic potential.

## 13 AMINO ACIDS

Amino acids play a major role in improving sustainability. Ajinomoto Animal Nutrition Europe has developed a customised amino-acid-based approach that can be used to tackle the challenge of dependency on soy-bean meals and nitrogen waste.

## 29 FARM REPORT

Producing a free-range chicken under the best conditions with plenty of food and freedom.
