

Farm visit

Strong demand for mixed day-old chicks in South Africa

Management

Preparing the house for the arrival of a new flock of Pekin ducks

Innovation

Lack of commercialisation of technologies stopping layer productivity improvements

POULTRY WORLD

Volume 36 - No. 7 - 2020

Interview

'ONE HEALTH APPROACH IS ESSENTIAL'

CONTENTS ▶▶▶

- 11** In 2019 the global poultry market increased for the third consecutive year
- 15** Hindering layer productivity improvements
- 20** Using LED lighting in breeder production
- 24** Core metagenomic functions of the poultry microbiome organ
- 27** Seven essential points when preparing for a new flock of Pekin ducks
- 28** Synergistic feed additive strategy to reduce antimicrobials

6 COVER STORY

Rens van Dobbenburgh: "So far there is no evidence that animals play a substantial role in the spread of COVID-19, but it does have its consequences for veterinary medicine."

12 BOSCHVELD

Since having bred his own indigenous free-range bird called the Boschveld over 20 years ago, Mike has enjoyed huge success exporting his chickens all over Africa. The Boschveld chicken is a three-way cross between three indigenous African breeds.

22 PROTEINS

Belgian researchers are using residues from algae production for human food to assess their application in chicken feed. This idea looks promising.
