28 BIOPROTEIN

Russia may overcome a shortage of protein on its domestic feed market thanks to several independent projects working on bioprotein production.

POLISH POULTRY INDUSTRY

6

The Polish poultry industry is recovering from a devastating six month period. First, its exports were hit by the AI epidemic when, a few months later, the COVID-19 pandemic inflicted even more damage. Now companies are ready to regain their position on the global poultry market and are even planning to expand into Africa and Asia. Some challenges remain, however.
