

Feed formulation

The effect of water-to-feed ratios on growing-finishing pigs

Plant extracts

Okra fruit has been shown to improve the meat quality of broilers

Country focus

Belarus domestic feed industry reaches the next level

ALL ABOUT FEED

Volume 28 - No. 8 - 2020

EQUIPMENT

Electric and automated feeding

CONTENTS ▶▶▶

- 12** Wood lignans are bioactive substances
- 14** Microbial diversity for ruminants
- 18** Polyphenols for feed preservation and animal nutrition
- 20** Using yeast derivatives to support aquaculture production
- 22** The Belarus domestic feed industry reaches the next level
- 31** Synergistic combination of plant extracts

26 COVER STORY

A roundup of new electric, mobile and/or automated machines currently available for farmers and a review of growing demand for this equipment.

FEED FORMULATION

Interest in giving pigs wet feed has increased, but there are still many unanswered questions about the effect of different water-to-feed ratios.

9

PLANT EXTRACTS

A phytogetic additive – 'Okra fruit' – has been shown to improve the meat quality of broilers. Eating this fruit also improves the bird's health status, as it possesses antibacterial, anthelmintic, and antioxidant properties.
