

## MYCOTOXINS

Modern tech combined with ancient organisms key to non-chemical prevention

## FEED SAFETY

ISO/TC 293: international standards for feed equipment

## YOUNG ANIMAL FEED

Achieving swine production goals without zinc oxide

# ALL ABOUT FEED

Volume 28 - No. 9 - 2020

# FEED PROCESSING

Thermal treatment eliminates pathogens

## CONTENTS ▶▶▶

- 8** Making silage: human safety issues
- 10** Protecting workers from hazardous minerals
- 12** Feed safety & shelf life: five questions put to a scientist
- 16** Factors influencing phytase recovery
- 20** The hidden threat of mycotoxins in aquaculture
- 24** The use of canola meal in pigs, poultry and aquaculture
- 26** Standardised ileal digestible lysine requirement for high lean weanling pigs
- 28** Achieving swine production goals without zinc oxide
- 30** Live yeast can benefit early rumen development

## 18 COVER STORY

At their production site in Heijen (Netherlands), ForFarmers have built a 40-meter-high tower containing a heating line for producing poultry feed.

6

## MYCOTOXINS

Canadian researchers combine modern tech with ancient organisms to find solutions to the problem of mycotoxin-producing fungi.
