

Materials for subsurface land drainage systems

10003

Contents

	page
1 INTRODUCTION	1
History	1
Contemporary drainage materials	2
Problems with drainage materials	3
Scope of this publication	3
2 DRAINAGE PIPES, ACCESSORIES AND AUXILIARY STRUCTURES	5
Drainpipes	5
Clay tiles	5
Concrete tiles	6
Plastic drainpipes	7
Pipe accessories	8
End caps	8
Couplers	9
Reducers	9
Pipe fittings	10
Protection structures	10
Drain bridges	10
Rigid pipes	10
Inlets	10
Blind inlets	10
Surface inlets	13
Connection structures	13
Junction boxes	13
Manholes	13
Outlets	13
Gravity outlets	13
Pumped outlets	17
Special structures	17
Gradient reducers	17
Cleaning facilities	17
Structures for controlled drainage and subirrigation	19
3 ENVELOPE MATERIALS	21
Materials	21
Granular mineral envelopes	21
Organic envelopes	22
Synthetic envelopes	24
Specifications for drain envelopes	27
Specifications for gravel envelopes	27
Specifications for prewrapped envelopes	30
Availability and cost	36

	page
Review of local experience on drainage materials	37
Arid and semi-arid zones	39
Humid Tropics	39
Temperate zones	40
4 WATER FLOW INTO AND INSIDE THE DRAIN	43
Flow towards the drain	43
Entrance and approach flow resistance	45
Water flow into the drainpipe	48
The exit gradient	48
The critical hydraulic gradient	49
Hydraulic failure gradient	51
Entrance resistance of drainpipes	52
Plain drain	52
Drain with envelope	56
Drain with a less permeable surround	58
Discharge capacity of drainpipes	59
5 THE PROBLEM OF CLOGGING OF PIPES AND ENVELOPES	63
Mineral clogging	63
Processes in soils around drains	63
Pipe clogging	67
Chemical and biochemical clogging	68
Iron ochre	68
Lime and gypsum depositions	72
Manganese deposits	73
Sulphur precipitate	73
Iron sulphide	73
Penetration of roots into drainpipes	73
6 GUIDELINES TO PREDICT WHETHER AN ENVELOPE IS REQUIRED	75
Physical properties of the soil	76
Soil texture	76
Structural stability	78
Moisture content	80
Chemical properties of the soil	80
Cation Exchange Capacity	80
Soil salinity	81
Soil sodicity	81
Water quality	83
Irrigation water	83
Groundwater	83
Prediction Criteria	84
7 GUIDELINES FOR INSTALLATION AND MAINTENANCE OF DRAINAGE MATERIALS	85
Installation of subsurface drainage materials	85
Installation procedures	85

	page
Guidelines with respect to drainpipes	87
Guidelines with respect to envelopes	89
Maintenance of drain pipes	90
Jet flushing	90
Empirical experience with jetting in northwestern Europe	93
Guidelines for jetting	94
8 RESEARCH ON DRAINAGE MATERIALS	97
Relevant soil characteristics and envelope parameters	97
Laboratory assessment of envelope applicability	98
Sand tank models	98
Parallel flow permeameters	100
Guidelines for permeameter research	102
Field assessment of envelope applicability	104
Field research	104
Guidelines for field research	105
Recommendations for future research	108
Drain pipes	109
Drain envelopes	109
Soil properties	111
9 STANDARDS FOR PIPES AND ENVELOPES	113
Testing parameters for drainpipes	114
Clay and concrete pipes	114
Concrete pipes	114
Plastic pipes	114
Testing parameters for envelopes	115
Granular materials	115
PLMs and geotextiles	115
Geotextiles	115
North American Standards	115
European standards	116
REFERENCES	119
ANNEX DRAFT EUROPEAN STANDARD ON CORRUGATED POLYVINYL CHLORIDE DRAINPIPES	131
